Type of Network Assets Located near Worksite	Overhead: ☐ Yes ☐ No Proposed work distance: _____meters	Underground: ☐ Yes ☐ No Proposed Work Distance: _____meters Dial Before Your Dig # Expiry Date:	

Work Type: ☐ Construction Work ☐ Scaffolding ☐ Utility/Services ☐ Agriculture	☐ Excavation Work ☐ Cranes and Mobile Plant ☐ Vegetation Management ☐ Other: _____	**Description of works:**
Address/Location of workplace:	Number / name of street:	
	Suburb / Postcode:	
Estimated Commencement Date:		**Estimated Completion Date:**

- Endeavour Energy will contact the applicant to advise of a date/time to meet at the nominated site to provide relevant safety advice.
- Where work will encroach in the unsafe distance of the overhead power lines, the Third Party and/or his representative must ensure that the appropriate exclusion zones are maintained until written safety advice is received from the relevant supply authority.
- The written safety advice shall be issued to the nominated responsible person by a representative of the relevant supply authority.
- Charges may apply for the installation of aerial markers, de-energisation or relocation of overhead power lines or the provision of an approved Safety Observer (if required) to carry out the work near overhead power lines.

I have obtained a copy of the NSW Code of practice 2006 "Work near overhead power lines" and the relevant guidance material published by Safe Work Australia and acknowledge that I am required to maintain an exclusion zone around the overhead electric lines until such time as I receive written safety advice from the relevant supply authority.

For a timely response it is advised you provide any or combination of the following (if applicable):

- Relevant training and/or licencing is held by all personnel including:
  - High Risk Work (HRW) License of Crane operator, boom pump operator, dogman, scaffolding tickets, EWP/boom ticket, etc.
  - Evidence of completion for Safety Observers and Operators of the following course: UETTDREL14A – Working safely near live electrical apparatus as a non-electrical worker
- Confirmation that procedures are in place regarding:
  - Adequate protocol for observing and communication between plant operators and ground crews
  - Emergency procedures in place regarding contact with powerlines
  - Appropriate rescue, response and first aid measures available on site
