## Endeavour Energy Public Lighting Price List

This price list shows Endeavour Energy's charges for the construction and maintenance of Public Lighting Infrastructure.

### Public Lighting Services

From 1 July 2009 Endeavour Energy provides Public Lighting under Tariff Classes which align with the Australian Energy Regulator's (AER's) Network Determination as shown in the table below:

Table 17.2 AER conclusion on public lighting tariffs and their determination		
Tariff class	Description	Basis of tariff determination
<b>Assets constructed* prior to 1 July 2009</b>		
1	Capital funded by DNSP	Annual efficient maintenance charge. Capital charge based on IPART approved RAB.
2	Capital not funded by DNSP	Annual efficient maintenance costs. DNSP not entitled to a return on or of capital.
<b>Assets constructed* after 30 June 2009</b>		
3	Capital funded by DNSP	Annual efficient maintenance charge (same as those for tariff class 2). Annual capital charge (return of and on) based on efficient material and installation costs.
4	Capital not funded by DNSP	Annual efficient maintenance charge (same as those for tariff class 2). DNSP not entitled to a return on or of capital.
5	Capital funded by the DNSP but asset replaced at the request of the customer before the end of its economic life.	Tariff calculated by the DNSP at the time of agreement to replace the asset early using an agreed method for determining the residual capital value of the asset. The charge is to be paid up front. Residual asset charge calculated for replaced asset based on remaining life determined through an assessment of the assets condition and/or type or the AER default value.

Source: AER, *New South Wales distribution determination 2009–10 to 2013–14*, p. 334.

In addition, Endeavour Energy offer's a number of unregulated rates for maintenance of public lighting assets owned by customers.

### Legacy Rates – Tariff Class 1 & 2

Assets constructed\* up to (and including) 30 June 2009 will be charged in the same manner as the previous determination period, adjusted in accordance with the AER's determination. Adjustments have been made for both inflation and redistribution of the existing asset base across the asset classes in a way which more closely reflects the age of each asset class.

These rates are a continuation of rates previously listed under **Schedule 1 & 2** and will no longer be available for assets constructed\* from 1 July 2009.

### Annuity Rates – Tariff Class 3 & 4

Applies to assets constructed\* on or after 1 July 2009 and are cost reflective rates, recovered over the life of the asset.

Tariff Class 3 rates apply where Endeavour Energy provides installation capital.

Tariff Class 4 rates apply where Endeavour Energy does **not** fund the installation and the contestable assets are gifted to Endeavour Energy.

### Residual Capital Value – Tariff Class 5

Applies where Endeavour Energy has funded the capital, but the asset is replaced at the request of the customer before the end of its economic

Using the AER's approved method, the charge is calculated at the time of agreement using the replaced asset's **weighted average remaining life**. The charge is paid at the time of replacement.

### Maintenance Only Rates – Unregulated Tariff Class

In addition to the five (5) Tariff Classes detailed above, the Unregulated Tariff Class will apply where customers request limited maintenance only services to non-standard public lighting assets that they own and are responsible for. The rates are cost reflective for luminaire only requirements.

These rates were previously listed under Schedule 3.

\*Constructed is defined by the AER as the date on which a customer accepts a quotation for the construction of new assets.

## Pricing Methodology

As per clause 11.56.3(j) of the National Electricity Rules, Endeavour Energy has escalated the 2013-14 Public Lighting prices by the assumed rate of inflation of 2.5% for the 2014-15 transitional year.

### Tariff Class 1 & 2

The AER have determined that Tariff Class 1 & 2 will be the 2009 closing asset base for public lighting consistent with the roll forward methodology accepted by IPART in its 2008 public lighting decision.

### Tariff Class 3 & 4

The AER have determined that Tariff Class 3 & 4 will be an annuity calculation based on the efficient maintenance and capital (Tariff Class 3 only) costs. Capital costs are recovered over the life of the individual assets.

### Tariff Class 5

The Residual Asset Charge is calculated for the replaced asset based on its **weighted average remaining life**.

## Unregulated Tariff Class

Unregulated Tariff Class is a cost reflective limited maintenance charge.

The attached price schedules show the Public Lighting prices to apply from **1 July 2014**.

## Terms and Conditions

Installation and connection of public lighting to the Endeavour Energy network is subject to customers meeting the requirements of Endeavour Energy's General Terms and Conditions. Endeavour Energy's document "SPJ 4004 Section 6 – Public Lighting General Terms and Conditions" can be found on the Endeavour Energy web site.

[Go to www.endeavourenergy.com.au](http://www.endeavourenergy.com.au)

choose "Our network" from top menu bar  
choose "Streetlights & Nightwatch"

### **Please note**

*These prices are applicable to Public Lighting Customers only.*
